

# LAMA LUMI

## YOU CAN HEAR SOMETHING DIFFERENT

LAMA LUMI is a three-member female group that brings a new wave of electropop combined with live rhythmic music to the Czech music scene. Our work combines 80's synthpop sounds and the latest dubstep figures with contemporary pop elements. Synthesizer and sampled backgrounds are complemented by live drums, keyboards, and vocals. All this under a canopy of neon colours and lights.

LAMA LUMI was created in Prague in the spring of 2018 and a year later settled into its final line-up. The rhythmic heart of the band is drummer Mirri Melcr, who combines acoustic drums with sampled beats when playing live. Ivana „Kivi“ Kadlčáková masters robust electronic sounds and their modulation, as well as classical keyboards and piano from the pedal to the top keys of her instrument set. The singer and creator of the background samples is Lucie Bártová, who occasionally supplements the individual passages with simple guitar riffs. A key element of the band's live performances is a combined video & light show supported by neon and lighting effects.
